NOTE.

Being the recognized collectors and dealers of Fine Arts in Japan, Messrs. Yamanaka & Co., of Osaka, were requested by their friend, Mr. Hirase, to dispose of his entire collection, the most of which he accumulated during the early part of Meiji, when Japan was greatly disturbed by foreign as well as domestic troubles.

Celebrated temples and palaces were in a state of great confusion and rare objects of art dismantled and sold.

The collection consists of carvings and Buddhistic objects of great merit; works of famous ancient sculptors such as Unkei, Tankei, Hidari Jingoro, Ota Yosuke, Mizuma Sagaminokami, Taniguchi Gonno-kami, who are very well represented.

To this Messrs. Yamanaka & Co. added a part of a collection of antique carvings of China which was secured in Pekin by Mr. Sadajiro Yamanaka soon after the Boxers trouble.

Owing to the scarcity of room, only the best part of Mr. Hirase's collection was selected for exhibition and sale in New York.

Necessary description of each article is herein briefly stated.

In addition to the Catalogue, Messrs. Yamanaka & Co. have published a short history of ancient architecture and sculpture of Japan.

Conditions of Sale.

1. The highest Bidder to be the Buyer, and if any dispute arise between two or more Bidders, the Lot so in dispute shall be immediately put up again and re-sold.

2. The Purchasers to give their names and addresses, and to pay down a cash deposit of at least 25 per cent., or the whole of the purchase money, *if required*, in default of which the Lot or Lots so purchased to be immediately put up again and re-sold.

3. The Lots to be taken away at the Buyer's Expense and risk, within 24 hours after the conclusion of the Sale, and the remainder of the purchase money to be absolutely paid, or otherwise settled for to the satisfaction of the Auctioneer, on or before delivery; in default of which the undersigned will not hold himself responsible if the Lots be lost, stolen, damaged or destroyed, but they will be left at the sole risk of the Purchaser.

4. No checks received unless certified.

5. The sale of any Article is not to be set aside on account of any error in the description or imperfection, and no warranty whatever is made. All articles are sold just as they are, without recourse.

6. To prevent inaccuracy in delivery and inconvenience in the settlement of the Purchases, no Lot can, on any account, be removed during the sale.

7. No claims allowed after the removal of goods.

8. Our record of sales in all cases final.

9. Upon failure to comply with the above conditions, the money deposited in part payment shall be forfeited; all Lots uncleared within the time aforesaid shall be re-sold by public on private Sale, without further notice, and the deficiency (if any) attending such re-sale, shall be made good by the defaulter at this Sale, together with all charges attending the same. This condition is without prejudice to the right of the Auctioneer to enforce the contract made at this Sale, without such re-sale, if he think fit.

142. OLD TEA ROOM RAMMA.

Mandarin ducks swimming in a country pond. This design is not unusual in Japanese paintings, which very often show not only details but also the exact attitude of swimming birds by means of different

shades. It is, however, scarcely seen in carvings of any kind, simply because they could not very well express their feelings in the same way as painters could. Sculptors' chisels and materials are not so convenient as ink and brushes. In this manner, the famous artist Yugetsu overcame the difficulty and was crowned with success; through him the art of carving reached its highest possible point; the most artistic tea room ramma in the collection; Yugetsu was an ingenious artist and worked for Prince Mayeda; signed; date, about 1800. 293. ANCIENT PALACE RAMMA.

Superb throwing out design of peony tree covering entire space ; magnificent flowers in high relief ; well balanced ; rich gold treatment toned down beautifully by age ; from Shugakuin palace ; date, about 1500.

Height, 2 ft. 5 in. ; width, $6\frac{1}{4}$ ft.

294. ANCIENT CARVED WOOD STATUE.

Contemplative Buddha seated on the sacred lotus flower ; "contemplative" it is so called because of the position of the fingers ;

the rings formed by them mean the joining the present with the future, signifying that there is time and space before him ; originally treated in gold, but now its traces could be found only here and there, leaving the most part in soft dark effect ; special attention is called to the chisel marks on the body of Buddha ; only flat knife marks could be seen and not the round chisel marks which characterizes that of modern sculpture ; the fact is, that at the time of the Ashikaga Shogunate (from middle of thirteenth century to the latter part of fifteenth) the use of the round chisel was unknown and that of the flat knife was the sole tool that sculptors had possessed ; executed by one of the instructors of Kasuga school by order of Ashikaga family, who presented it to Genkoji temple in Nara.

Height, 48 inches ; width, 26 inches.

295. ANCIENT TEMPLE RAMMA.

Two angels welcoming Buddha in the clouds ; one holding a lotus flower and the other singing and playing a sacred drum ; charming work, finished in gold ; date, 1500.

Height, 1 ft. 8½ in. ; width, 5 ft. 11 in.

No. 299.

296. ANCIENT TEMPLE RAMMA.

Exquisite carving of kiri and howo birds in the clouds, touched with costly pigments of various colors, which by age and long exposure cooled down to a most delicate tone; this is one of the few existing specimens by Kaikei, whose name was immortalized by the valuable assistance he rendered to Unkei in the execution of the Nios, guardian gods that stand to the present day in the entrance gate to the Todaiji temple in Nara, from where this grand work is secured; date, about 1200.

Height, $2\frac{1}{2}$ ft; width, 5 ft. 10 in.

297. VERY OLD WOOD CARVING.

Solid piece of wood carving of carp fish; Mokutaku (wooden bell) it is so called because in ancient times it was used by the Zen sect in place of bell; one side of the fish is very much worn out by constant striking; this interesting piece of work was brought from Daitokuji temple in Kyoto, and was attributed as the undoubted work of the renowned Unkei; date, about 1200.

Length, 6 ft. 1 in.; circumference, 4 ft. 5 in.

298. ANCIENT PALACE RAMMA.

Mandarin ducks swimming in the water ; a bit of rock on one side and the lotus flower on the other is gracefully introduced, making the whole composition perfectly charming ; every line and curve betrays the good taste, spirit and feeling of the artist, Tankei, a contemporary of Unkei ; from Kinkakuji temple in Kyoto ; date, 1300.

Height, 2 ft. 10½ in. ; width, 5 ft. 7 in.

299. SUPERB OLD DOORS (FOUR IN SET).

Natural color of sugi wood most exquisitely cooled down to a reposeful tone ; originally the carvings must have been treated in colors, but little trace of them is left because of age and constant exposure and only the grain of wood is noticeable ; each door is partitioned into six small sections, and each section is embellished with carving of different designs, Buddhistic images, crests of the Tokogawa family, howo birds, peony, lotus and chrysanthemums ; has interesting iron hinges and ornament ; very rare and superb specimen ; from Kunoza temple, one of the mausoleums of Tokugawa family ; artist, Ryuho ; date, about 1650. See illustration. Height of each door, 79 inches ; width of each door, 18 inches.

No. 299.

300. REMARKABLE PALACE BUTSUDAN.

One of the most valued treasures in the Shugakuin palace in Kyoto; it would be next to impossible to give any idea of the merit and magnitude of the work in this short space accorded to it; only a brief description is given below and the rest is left to the interested and critical public. The exterior is a tall square chest of black lacquer; the front side elaborately inlaid with mother-of-pearl in design of throwing out tendrils; minute geometrical plan, etc.; on the lower panel door, lotus pond gracefully worked in same material, while the drawers are of conventional decorative design; the sides are covered with old linen on which lacquer is slightly coated and finished with red frames. Double doors of four folds each will be opened to the inner splendor; the first or the outside doors — each fold 10 x 41 inches, exterior of which is embellished with a Chinese poem and other interesting design in beautiful mother-of-pearl, while the reverse side is a most elaborate and minute decoration in same material; the second or under doors, — each 9 x 36½ inches, are of gold fret work lined with the green sha cloth; the lower panel, the frame and the fret work proper are

beautifully inlaid both inside and out ; the panel — Chinese sceneries most minutely worked in ; even the smallest detail is most noteworthy. The interior will remind one with the splendor and dazzling beauty of Japanese temples ; ten gold pillars supporting the ornamental part of the structure ; beautifully carved and fret work rammas in two rows ; between the rammas and ceiling, which is decorated, are gorgeously constructed wooden work and moulding, all in gilt ; the background is also gilt, with the “Gokuzaishiki” painting of Buddhistic angels flying about the sky, petals of lotus flower scattering in the wind. The sacred place is about six inches high and is surrounded by red lacquer railing ; above it a massive dragon in arch shape. It is very rare and extraordinary that such a magnificent work could be produced in mother-of-pearl ; date, about 1700. See illustration.

Height, 6 feet ; width, $3\frac{2}{3}$ feet ; depth, $2\frac{1}{6}$ feet.

and exposure ; this impressive work of art is especially worthy of note in many respects : (1) for its length, (2) for the beautiful wood grain, (3) for its harmonious composition and wonderful execution, etc. ; because of rare quality of the wood (Yoshino sugi) the citizens of Yoshino village presented it to the Koyasan temple, where the temple sculptor, Teiki, transformed it into this wonderful work of art ; after completion it was used as a moulding ramma in the main hall, and was known as the "Two Dragons of Koya" ; date, 1660.

Height, 1 ft. 1 in. ; width, 12½ ft.

441. LACQUER ROMON (GATE).

bellished with carvings in colors; all finished in lacquer with the exception of carvings, which are treated in rich pigments.

Height, about 7 feet.

446. STATUE OF DAINICHI NYORAI (TATHAGATA MAHAIROKAMA).

Sakyamunis' self and inner enlightened body; he preached the doctrine of the secret mantras or true words to his own subject; this doctrine is recorded in the sutras, such as Dainichi Kyo and Kongocho Kyo of five hundred thirty and five hundred thirty-four books respectively. There are today millions of men and women in India, China and Japan and other Oriental nations attracting no attention of Occidental scholars and teachers.

This great and good Nyorai is seated on the lotus stand, supported by a mythical lion in a true Indian fashion — his knee legs folded — holding the mudra, or the seal of the fist of wisdom; on his head the crown of enlightenment and perfection, in gorgeous metal work, gracefully resting; the halo, in striking contrast to the simplicity of the statue, is dazzling; it is a leaf-like wooden panel in gilt with deeply carved design of the clouds and howo birds, supposed to make

appearance only when a great man comes to the world. The pedestal, in octagonal shape, is very interesting ; it is embellished with minutely carved small panels of floral and arabesque design.

The gentle expression of the Nyorai, magnitude of conception and execution, splendor of polish and gilding, all these are enough to inspire pious worshippers who may come before the image with the traditional awe and reverence. And again, these qualities may not fail to draw the attention of the lovers of art ; from Fumon-in temple in Koyasan ; date, about 1700. See illustration.

Whole height, $7\frac{1}{4}$ feet ; height of stand, $3\frac{1}{3}$ feet.

447. PAIR PALACE DOORS.

Of keyaki wood ; natural color ; battered and subdued to a charming tint, revealing the grain of wood ; ornamented with fine carving of arabesque, kiri and howo birds in rich pigments, also cooled down ; has original iron hinges and decoration ; from the Zojoji temple in Tokyo, one of the family mausoleums of Tokugawa ; very rare example ; date, 1650.

Height, $7\frac{1}{4}$ feet ; width, $4\frac{1}{4}$ feet.

No. 446.

448. SUPERB TEMPLE RAMMA.

A pair of oshidori (mandarin ducks) in two different positions in the lotus pond; treated in costly pigments of red, green and blue, beautifully cooled down; notice the bold wavy lines of water; crude as they are, how suggestive; again, the lotus leaves and flowers that peep out and float on the water; it is altogether a work of art; although the artist is unknown, one would not hesitate a moment to see it is from the chisel of some great master; secured from the abbot's study in Chionin temple; the frame and background is of later period; date, about 1400. See illustration.

Height, 2 ft. 5 in.; width, 7 ft. 10 in.

449. MASSIVE DRAGON.

Of keyaki wood; Marubori carving (solid piece carving); the fierce monster coiling amid the clouds; well balanced and carefully chiseled; for years this excellent work of great magnitude was the centre of admiration in the hall of worship at the Yei-heiji temple in Kaga, where it was known as the master work of Hidari Jingoro; at the time of the fire, when the temple was reduced to ashes, this dragon was miracu-

lously saved and moved over to the castle of Lord Kaga; he, the lord, not knowing where to keep it, placed it upon the entrance gate of the castle; but evidently it was not the right abode for the monster, so the tradition goes, and once in a while at the dead of night he went down to the villages and towns below destroying houses and temples; the news reached to the pious lord, who summoned all the Buddhist priests in his domain and spent days in prayer and sacrifice; this faithful act seemed greatly to please the monster, for never again did he make an appearance and peace once more reigned over all.

On close examination it was learned that the sculptor, instead of being Hidari Jingoro, was Hidano Takumi, an artist of the rank of "Takumi," belonging to the famous Hida school; the name is cut in the body of the dragon; is one of few massive carvings in existence in Japan; date, about 1700. See illustration.

Length, $16\frac{1}{8}$ ft.; height, 3 ft. 5 in.

450. MAGNIFICENT DANJIRI.

More properly "Jiguruma" (ornamented wheel shrine). Built entirely of natural color of keyaki wood (*planca japonica*).

No. 450.

A perfect model of most improved type of temple architecture. Ornamented most gorgeously with minutely sculptured representations of fantastic animals and historical designs. Hardly an inch is left where there is not some form of carved decoration.

The Hall of Worship is guarded by two grand pillars (maibashira) of historical subjects. On the right, facing the danjiri, the Dowager Empress Jingo is standing on the cliff under the pine tree, and on the left her faithful chamberlain, holding in his arms the child emperor Onin. The base and frieze are of massive carvings of various designs, among the most prominent of which is that of mythical lions leaping along the cliff and among peonies.

The bow-like roof, 32x30 inches, has somewhat hollow dips, and the edges are decorated with metal fastenings. It is surmounted by a solid piece of sculptured dragon, 63 inches in length and 19 inches in height; half of the body extending on to the back roof. Just below the head of the main dragon, following the curve of the roof, is set a pair of young dragons in one solid carving and 42 inches in width. The back hall, the holy of holies, is by no means less imposing. The roof, 32x22 inches, is

supported by pillars of various types of carving, which are interesting in design, delicate and perfect in execution. There are quite a number of glass balls and coral ornaments distributed among carvings and add much charm and attractiveness. The danjiri proper is constructed with more than seventy different parts and could be taken to pieces. Each part is numbered so as to facilitate its reconstruction. Beside, a pamphlet will be given to purchaser — pamphlet of original brush drawings of each part numbered, and also with Japanese architectural name.

The stand is of lacquer with enrichments of varied designs on four sides, such as lion heads, rabbits leaping over the waves, warriors, etc. They are either plain, gilt or color treatment. The railing is of mother-of-pearl inlaid.

Mr. Sugano, of Osaka, one of Japan's wealthiest men, had conceived the idea of building a magnificent danjiri, regardless of time and expense. The order naturally was given Mr. Genzo Komatsu, the rising architect and sculptor, because of his successful construction of the Osaka branch of the Hongwanji temple. The work began in 1790 and it went on smoothly until the spring of 1800, when Genzo died, leaving it

half finished. It was indeed a great loss, but his eldest son, Gensuke, creditably took up the work, following the plan of his father, and in 1805 this marvellous piece of work was brought to a completion. In the summer of the same year it was for the first time exhibited to the public during the annual festival of the Tenjin, to which it was formally dedicated. For many years it was customary for the Sugano family to give a public exhibition on the same occasion. From far and near people came crowding purposely to see the famous Sugano danjiri. Various medals were awarded at the National Exhibitions held in Nara and Kyoto, and at lesser exhibitions.

Whole height, 9 feet ; the stand, $3 \times 3\frac{5}{6} \times 5\frac{2}{3}$ feet.
